IQAC has a primary concern to adopt practices providing quality education to students through an effective and meaningful teaching learning process playing a vital role in enhancing quality of academic and cocurricular endeavours of the college in keeping with its vision and mission. IQAC achieves this through collecting feedback from stakeholders like students, staff and alumni to facilitate teaching-learning reforms helping in obtaining an unbiased and honest opinion about the institutional performance especially in academics. Student feedback of teachers is conducted regularly. A careful analysis of the feedback received is carried out and the result is communicated to the teachers to enable them to enhance their teaching skills as well as relationship with the students. Based on the information received due to implementation of the above two practices, IQAC, post accreditation, has been able to develop a system for conscious, consistent and catalytic action to bring about reforms in teaching learning process, structure, methodologies and learning outcomes. Each department is encouraged to organize lectures on themes relevant to the educational needs and futuristic development of the students. Teachers are encouraged to use ICT tools to prepare and deliver their lectures through audios, videos and PPTs.
